PLANTI
PLENTY OF VALUE

THE TEAM

People behind Planti growing light sees the needs of greenhouse growers and understands what it takes to bring more value to growers.

THE DESIGN

We believe that good products should look beautiful. Our engineers keep “adding value” in mind that they want a product to be sleek and compact. Our light makes less shadow in the greenhouse.

THE MANUFACTURING

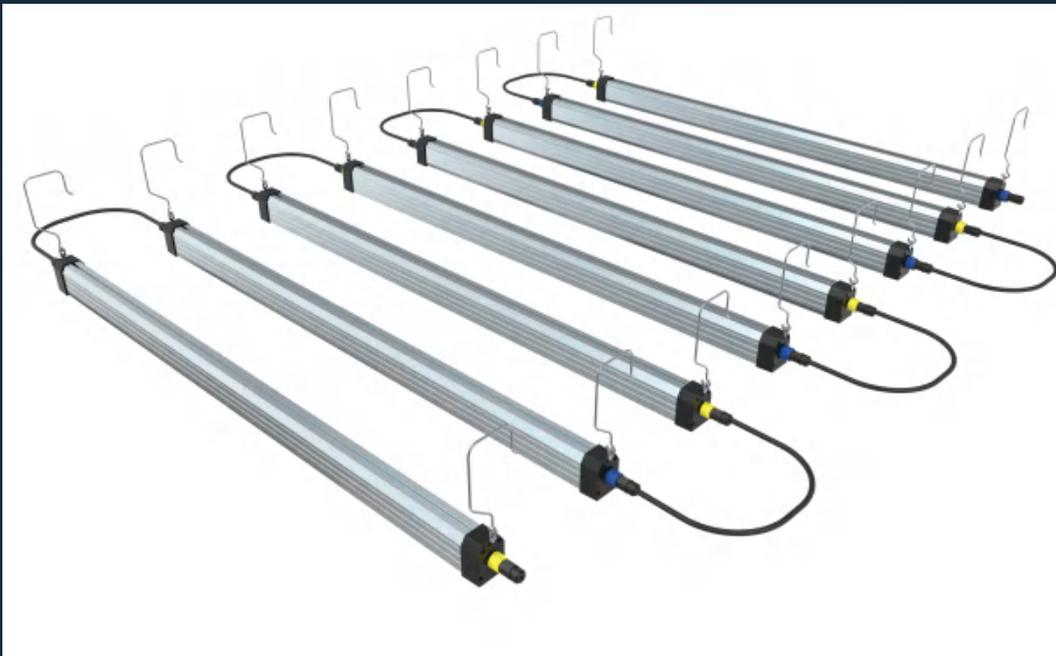

We take a seven-step method to assemble our products, and it dramatically reduces the failure rate. Our workshop and lab are aligned in such a way that on-site improvement could be made anytime needed.
